HUM Audio Devices are a Polish company, based in Łódź, that specialise in the manufacture of active ribbon microphones of the highest quality.

To avoid the normal noise problems that ribbon microphones can have, The HUM Audio ribbon microphones are active and 48V phantom powered - each microphone has an internal amplifier, matched to the ribbon, and the output is of the same order as a modern capacitor microphone.

The RS-2 stereo microphone is fully remote controllable and the controller is connected via a standard XLR-3 microphone cable, which allow great flexibility. The power supply, remote controller and cables are included in the price.

The ARM-1L microphone has the same 2" ribbon as the RS-2 and sounds basically the same as the stereo microphone - the ARM-1S has a short 1" ribbon. Both ARM-1 microphones have the same housing and are identified by the blue writing and suspension for the 1L and white writing and suspension for the 1S.

The RP-2 is similar to the power supply and remote control that is delivered with the RS-2. This is a fully discreet Class-A pre-amplifier and is designed for two phantom powered microphones - although intended for the ARM-1L/S it can be used with any phantom-powered capacitor microphone. In addition there is a direct injection instrument jack socket on both channels for great flexibility. Like the RS-2, the remote control uses standard XLR-3 microphone cables and one is included in the kit.

Model	Description	UK Price - £		
		excl. VAT	Inc. 20% VAT	
	<p>The RS-2 is the world's first remote controlled, Stereo/M-S ribbon microphone with built-in High-End discrete microphone preamplifiers.</p> <p>The system contains: RS-2 stereo ribbon microphone, RS-2 remote control unit, RS-2 power supply, Custom cable set (mic. to PSU cable, remote control cable, mains cable), microphone head dust cover, flight case.</p>	4,713.00	5,655.60	
	<p>The ARM-1L is an active, phantom powered, ribbon microphone with a long (2") ribbon. The system contains: ARM-1L microphone, microphone head dust cover, flight case.</p> <p>For identification the model number on the microphone is coloured BLUE as are the suspension O-rings - in addition the flight case has blue side strips.</p>	1,691.00	2,029.20	NEW
	<p>The ARM-1S is an active, phantom powered, ribbon microphone with a short (1") ribbon. The system contains: ARM-1S microphone, microphone head dust cover, flight case.</p> <p>For identification the model number on the microphone is coloured WHITE as are the suspension O-rings - in addition the flight case has black side strips.</p>	1,691.00	2,029.20	NEW
	<p>The RP-2 is a remote controlled 2-channel microphone Class-A pre-amplifier with DI. It is suitable for any phantom-powered microphone and is ideal for anyone working with Mid/Side configurations as the array is fully remote controllable - it also has a direct injection jack socket on each channel for an instrument input. Supplied complete with remote controller and connection cable.</p>	2,257.00	2,708.40	NEW
